

My opponent was a real person and not a robot.

Bot pattern

- Previous move
- Opponent previous move
- Previous move, opponent previous move
- Previous two moves
- Self-transition
- Opponent-transition
- Previous outcome
- Previous outcome, previous transition

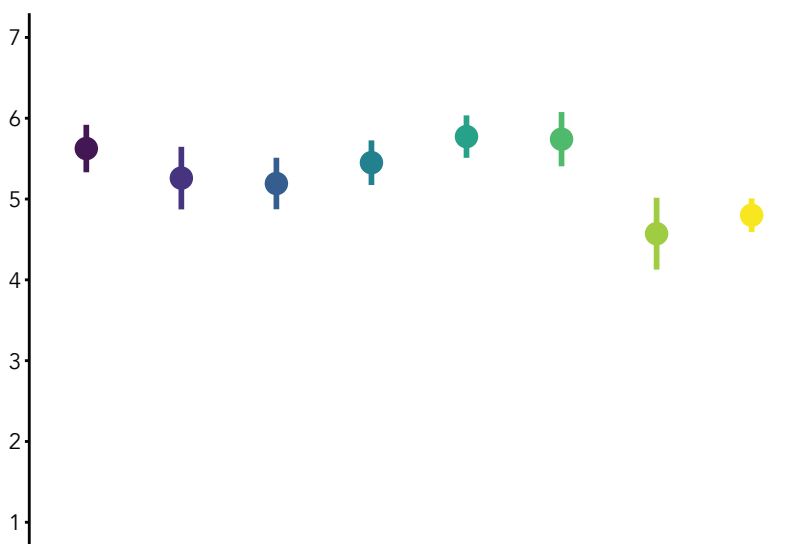

I was trying to win each round against my opponent.

I was focused on winning for the entire time I was playing.

I paid attention to my opponent's moves in order to try and predict their next move.

There were noticeable patterns in my opponent's moves that allowed me to predict their next move.
